Net income +6% YoY	**Efficiency ratio** -1.2 pts	**Tech programme** over 3 years	**Headcount** flat

Headlines

- Net income rose 6% year on year on stronger net interest income and lower credit provisions.
- Management announced a three-year, $400M technology modernisation programme focused on data, cloud and digital channels. CTO Michael Tan named "one governed data platform" as the first priority.
- The bank reiterated its target of a sub-55% efficiency ratio by 2028, citing warehouse consolidation savings.
- Regulatory: management referenced continuing work on BCBS 239 risk data aggregation findings.

What it means for Visionet

Signal	Implication	Opportunity
$400M modernisation, data first	Budget for consolidation is real and sponsored by the CTO	OPP-24120 ($3.1M)
Efficiency target via consolidation	Expect pressure on price in BAFO; show run-cost savings (31% modelled)	OPP-24120
BCBS 239 findings	Lineage automation is a must-have	Unity Catalog lineage proven in POC
Digital channels investment	Possible future work on channel data and GenAI assist	Whitespace
