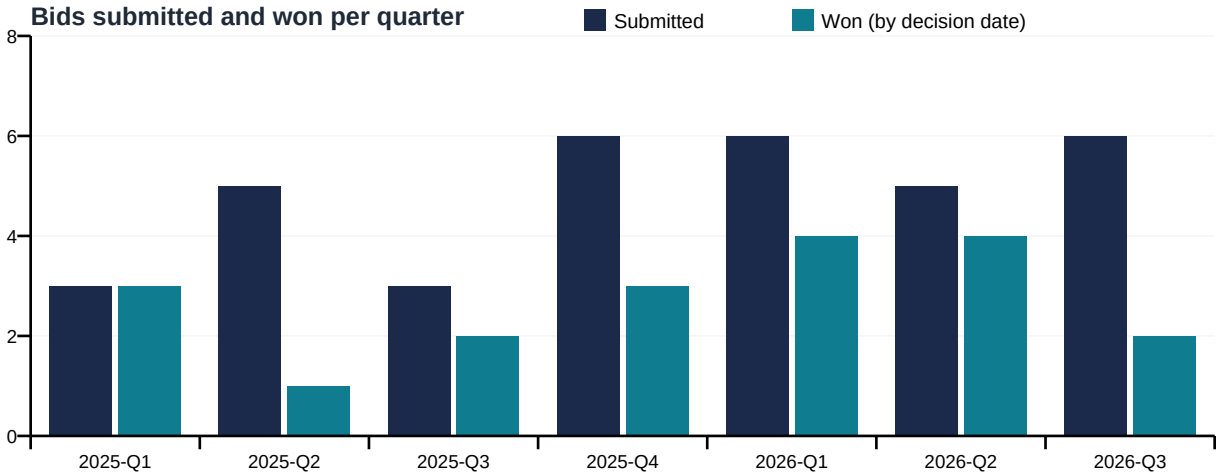
Submission volumes by quarter



Q3 2026 was the busiest submission quarter on record (Meridian, Woodgrove, Tailspin, Relecloud, Wide World). Four of those decisions land in Q4, so Q4 win rate will move the full-year number materially.

Observations

- Data & AI is the largest and most successful service line by won value.
- Deals above $3M have the longest cycle (Atlas took 102 days); the Calder RFP allows only 15 days to respond.
- Cycle time for renewals averages under 80 days; start renewal proposals 120 days before contract end.
- No-bids: 3 in Q3 (Southridge Video, Margie's Travel, Bellows College) saved an estimated 640 bid-team hours.
