Enterprise Data Platform Modernisation - Executive Summary

Response to Woodgrove Bank RFP WB-DATA-2026-07 | Submitted 25 September 2026

Client	Woodgrove Bank (ACC-1003)	**Term**	30 months
Opportunity	OPP-24120 / BID-0612	**Partner**	Microsoft (co-sell MSRF-3318842), Databricks
Total contract value	$3.10M	**Decision**	20 November 2026

Why this matters to Woodgrove

Woodgrove runs three data warehouses (Teradata for finance, Oracle Exadata for risk, and a Hadoop cluster for digital channels). Catherine Hughes, appointed Chief Data Officer in August 2026, has a mandate to consolidate them onto one governed platform by the end of 2028 while meeting BCBS 239 risk data aggregation principles.

BCBS 239 lineage

4.2x
POC result
faster card-fraud features

Our proposal

A lakehouse on Azure Databricks with Unity Catalog governance, delivered in four domain waves: payments and cards (already proven in the PRG-2004 proof of concept), retail lending, risk and finance, and digital channels.

Wave	Domains	Months	Key outcome
1	Payments & cards	1-7	Teradata card marts retired; real-time fraud features
2	Retail lending	6-13	Credit decisioning data in one place
3	Risk & finance	12-22	BCBS 239 lineage for 47 regulatory reports
4	Digital channels	20-30	Hadoop cluster decommissioned

Proof of concept results (PRG-2004)

The ECIF-funded proof of concept (Microsoft funding $120,000) ran from 3 August 2026 on the payments and cards domains with Rachel Adeyemi's data engineering team.

- Card-fraud feature pipeline runs in 11 minutes against 46 minutes today (4.2x faster).
- Unity Catalog lineage traced 100% of the 12 in-scope regulatory data elements end to end.
- Infrastructure cost per daily batch is 38% lower than the Teradata baseline at equal workload.

Commercials

Component	Model	Value (USD)
Waves 1-4 implementation	Fixed price per wave	$2,480,000
Platform operations (months 7-30)	Managed capacity	$520,000
Knowledge transfer and enablement	Fixed fee	$100,000

Component	Model	Value (USD)
Total		$3,100,000

Woodgrove has requested a best-and-final offer (BAFO) by 14 October 2026. Competitors known to be bidding: Accenture and Infosys.
