Tailspin Airlines: 798 servers to AWS in two on-time waves

Case study | Travel & Transport | AWS Migration Factory

798	On time	$210K	-27%
Servers migrated 2 waves	**Schedule** both waves	**MAP credits** wave 2	**Run cost** infrastructure

Summary

Visionet migrated 412 servers in wave 1 (2025) and 386 in wave 2 (closed 12 June 2026) from Tailspin's Dallas data centre to AWS, using a factory model with weekly move groups and AWS Migration Acceleration Program funding.

- Zero unplanned outages during flight operations windows.
- Dallas data centre lease reduced by 60% of floor space.
- Landing zone now hosts the proposed crew operations platform (BID-0608).

Reference status: referenceable for infrastructure; not yet for applications.
